EDUCATION

University of California Santa Cruz, Santa Cruz, CA

August 2024 – Present

Bachelor of Science (B.S.) in Computer Engineering

Minor in STEM Education (Math)

Expected Graduation June 2027

Relevant Coursework: Intro To Machine Learning, C Programming, Programming Abstractions in Python, Research Explorations, Computer Systems and Assembly Language, Multivariable Calculus for Engineers, Linear Algebra, Applied Discrete Mathematics, Differential Equations, Introduction to Physics I/III

PROJECTS

- **Cramberry, Project Leader** July, 2025 - Present
 - Delegating tasks with co-founder to build **cloud**-based study material organization website
 - Integrating database of user inputted files using **React, Javascript** and **CSS**, all stored in **Github**
 - Used **Figma** for building grid-like user interface where users can easily view organized files
 - Implemented **compression algorithm**, integrating responsive UI for persistent storage changes
- **SlugClub, Full-Stack Developer** April 11, 2025 - April 13, 2025
 - Pitched a **MERN** stack website developed in a team for CruzHacks 2025
 - Merged the frontend from **Figma** with backend using **Docker** and **MongoDB**
 - Used real time **data synchronization** for clients to easily update **server** with information
- **SlugFind, Project Lead** October 2024 - April 2025
 - Presented UCSC **full-stack forum site** solving UN Issue for Google Developers Challenge
 - Prototyped layout in Figma; frontend, serverside, and authentication completed with **MERN**
- **Cat Emotion AI, Lead Programmer** January 2024 – March 2025
 - Won 4th place pitching **CNN** trained to correctly predict emotion category of 3 new cat images
 - Trained from **0.6411 to 0.0135** error on real world dataset with over 3000 real world images
 - Programmed in **Python**, debugged and analyzed errors with **Pytorch** and **Matplotlib**
- **GameGenAI, Lead Programmer** February 2025 - March 2025
 - Pitched an **RNN** built to predict a game genre based on the language within the description
 - Analyzed to clean dataset from 350,000+ to 15981 values, producing 59 readable characters

ACTIVITIES & SKILLS

- **Baby Slug Game Developers Club, Leader** (September 2025 - Present)
 - Host biweekly meetings by leading discussions, tutorials, and projects, management of socials
 - Delegate club leads' tasks for outreach events (Baskin Day), maintaining Baskin Affiliate status
- **Rewriting The Code, Affiliate** (September 2024 - Present)
- **Intro Cybersecurity, Cryptography, HTML and CSS Courses, Certificate** (October 2023)
- **Technical:** OnShape, MongoDB, Express, React, Node.js, Git, C, JavaScript, HTML, CSS, Python, Machine Learning, Figma, Kubernetes, NumPy, Tensorflow, OpenCV, Pytorch, scikit-learn, LLM, CNN, RNN, VEX Robotics, Visual Studio, C#, Blender, Unity, Tinkercad
- **Language:** Bengali (Intermediate: speaking), Spanish (Beginner: reading, speaking), English
